

AT-HV-MU Series Fresh Air Make-Up Air Handlers

Keep Air Inside the Vessel From Going Stale

The AT series of fresh-air make-up air handlers (AT-HV-MU) for chilled water systems duct in outside air, cool and dehumidify it, then re-heat it to room temperature and duct it to various interior spaces. Typically, crew cabins and other spaces two or more levels below deck will benefit from the use of these systems.

AT-HV-MU air handlers consist of a water coil, valve, electric heater, and high-velocity (HV) blower mounted on a condensate pan/chassis with cushioned mounts to reduce noise and vibration.

The specially-designed water coil cools and dehumidifies outside air in one pass. The coil, as well as the blower and all exposed sheet metal components, is coated to resist corrosion. A motorized three-way bypass valve controls the flow of circulated water through the coil. The HV blower has a high-efficiency internal motor, and can be rotated as required for installation. Ultra-quiet DC "WhisperCool" blowers are available. An electric heater with redundant over-temperature protection reheats the cooled air to room temperature.

The sloped "positive-flow" condensate pan reduces standing water and is lined with anti-fungal and anti-slosh foam. The blower, condensate pan, and other exposed areas are insulated against secondary condensation. An optional modulating loop-water flow control regulates the water through the unit to ensure proper water distribution to all air handlers.

Key Benefits

- Compact design.
- Corrosion-resistant coating on evaporator coil, blower, and drain pan.
- Patented.
- Drain pan has anti-slosh, anti-fungal foam lining.
- High-velocity (HV) fully-insulated blowers are rotatable.
- Integrated three-way bypass valve with easy-change power head.
- Electric heat with two-stage electric heat overload.
- Heater assembly accessible from the top or side.
- Large coil shroud volume for optimal performance.
- Brass hose barb loop-water connections.
- Electrical box can be remotely mounted up to 6 ft. (1.8 m).
- Remote air bleeder on 6 ft. (1.8 m) of flexible tubing with ball valve.
- Built-in flow control balances chilled water distribution.
